

The Snap Booth – Marquee / Outdoor event requirements:

We are happy to provide our booths for outdoor events, providing the following can be met by the client or organizers before booking:

- We must be in an outdoor Marquee or suitable outdoor setting. The Snap Booth cannot be in any outdoor open environment without cover or protection from the elements. If you are thinking about booking, please provide an image, if possible, of your outdoor fixture for us to assess. You can provide this by visiting our website snap-booth.co.uk and clicking on the contact us page, where you can attach an image file.
- We require power to operate our booths; we require a generator no older than four years. We also require proof of this for insurance purposes.
- We require a strong Wi-Fi connection to use the multimedia tools on the back of our booths (Such as Email and SMS). If possible, with a connection of 5 MBPS or more. Where this is not possible, we may hotspot or tether from our mobile equipment. Please note that this may not be possible as this is subject to 4G/5G in the area; if there is no suitable signal, we will be unable to provide a hotspot or tether. You will still be able to use the photo booths like normal, but without this connection will be unable to use the Email and SMS functions.
- We must be on suitable ground, usually a hard temporary flat solid flooring. We cannot go onto grass or any other outdoor surface, including fabric or fibre flooring (usually found in tipi's). The flooring (Usually supplied by your marquee company) will need to be able to hold a weight of 100KG (16 Stone)
- If you are unsure of any of the above, we will be happy to work with you to assess if it will be possible to provide a booth for your event. Please get in touch with us either by email at hello@snap-booth.co.uk or by visiting our website, snap-booth.co.uk and clicking on the contact us page
